

David Fleeman, P.E., LEED®AP, BD+C

Associate Vice President/Senior Project Manager

Mr. Fleeman is a Project Manager in the Tampa Division with over 20 years of experience designing and permitting roadway, stormwater, water, sewer, and force main improvements for municipal, residential, commercial, institutional, and industrial clients. His experience includes several infill/redevelopment projects within highly developed institutional campuses that involved extensive utility relocations and complex construction sequencing to maintain service during all phases of construction.

Miscellaneous Engineering Services Contract (City of New Port Richey, FL).

Project Manager for an ongoing miscellaneous services contract. His recent work effort includes coordinating a traffic study to evaluate the impact of vacating roadway necessary to enlarge Sims Park. Additional tasks include preparation of a citywide Roadway Needs Assessment Report and construction drawings for the 2015/16 Street Improvement Project.

Seminole Road (City of Atlantic Beach)

Seminole Road was a narrow rural roadway that served as a primary thoroughfare for emergency service vehicles. Drainage Engineer responsible for design of the stormwater infrastructure necessary to convert this 0.5 mile roadway into an urban road. The project includes rain gardens to provide a measure of water quality treatment for the first flush.

Miscellaneous Engineering Services Contract (City of Temple Terrace, FL).

Project Manager for this ongoing contract and has overseen several task orders for the City of Temple Terrace including designing and permitting construction plans to reduce historic localized flooding in the Pleasant Terrace community of Temple Terrace.

FAMU Way (City of Tallahassee)

The City of Tallahassee is working with Blueprint 2000 to reduce flooding and construct new roadway near the FAMU campus. The second phase of FAMU Way includes 0.40 miles of divided roadway construction with roundabout intersections. Drainage Engineer for the roadway and off-line regional stormwater pond.

Werner-Boyce Salt Springs State Park (Pasco County, FL).

Project Engineer assisting with permitting and construction administration/observation for this 3.56-acre phase of FDEP's multi-phased project. Amenities include a Day use area with raised restroom facility (with lift station), observation deck, elevated boardwalks, 2 paved parking areas and 3 stormwater management facilities.

Hillsborough Community College-Ybor Student Services Building (Tampa, FL).

Project Engineer for redevelopment of 2.37 acres of HCC's Ybor campus that included limited demolition to minimize cost and re-use much of existing infrastructure. Design included analysis of existing stormwater management facility to determine modifications required to meet both existing stormwater permit requirements as well as those associated with proposed improvements. Project received LEED Gold Certification.

Miscellaneous Engineering Services Contract (Pinellas County School Board).

Project Manager for this ongoing contract and has conducted numerous stormwater operation and maintenance inspections for the Board.

Continuing Services Contract (Hillsborough Community College - HCC).

Engineer of Record for several projects spread across the various HCC campuses during the lifespan of the multi-year contract. One task included design and permitting of the 31,000 SF courtyard renovation of the Dale Mabry Campus. The project included construction of a drainage collection system within an area occupied by numerous undocumented underground utilities. The final design improved both surface drainage, underground conveyance and most importantly enhanced the public space.
